## DIVISION COLLECTION

### REQUIREMENTS FOR LEED CERTIFICATION: **BEAT**

---

In accordance with de LEED certification the ceramic tiles of the BEAT series can contribute to LEED points in the following requirements:

MR-Material & Resources (1)	MR Credit 4.1-4.2 Recycled Materials Content	<b>Minimum amount of pre-consumer recycled content: 62%</b>
MR-Material & Resources (2)	MR Credit 5.1-5.2 Regional Materials	<b>Use of materials in a radius &lt;800 km.</b>
EQ-Indoor Environmental Quality (3)	EQ Credit 4.3 Low-Emitting Materials	<b>No VOCs emission</b>
SS-Sustainable Sites (4)	SS Credit 7.1 Heat Island Effect	<b>SRI (Light colours) &gt;29.</b>

(1) Ceramic tiles of the BEAT series contain a percentage of pre-consumer recycled material of 62%.

(2) Ceramic tiles are manufactured using an atomized powder as raw material, where the distance of origin is less than 800 km.

(3) None of the ceramic tiles of the BEATseries release VOC's (Volatile Organic Compounds) and therefore do not emit any air pollution, which translates into an increase in Indoor Environmental Quality.

(4) Ceramic tiles with light colours have a Solar Reflectance Index (SRI) equal to or greater than 29, contributing to the reduction of the "heat island effect".
