## SANTA MONICA COLLECTION

Cifre Ceramica S.L. certifies that our WHITE BODY TILES (BIII) are produced with recycled materials in a percentage over 50%. Detailed composition of the atomized material used in the production process of this range is provided.

### RECYCLED CONTENT

61%

61% of minimum recycled content, including raw materials, hydrics and minerals.

- Contains recycled wastewater from external origin previously used in the factory.
- Contains recycled solid materials from internal origin previously used.
- Contains recycled solid materials from external origin previously used.

PRODUCT	POESM-41
Total water content (kg)	459
Total solid material content (kg)	943
Fresh water content (kg)	0
Recycled wastewater from internal origin content (kg)	227
Recycled wastewater form external origin content (kg)	232
Fresh solid material content (kg)	548
Recycled solid materials from internal origin previously used content	233
Recycled solid materials from external origin previously used content	162
<b>RECYCLED CONTENT (%) [X=A/P*100]</b>	<b>60.9%</b>

40% of the water used during the whole production process (pressing, glazing and firing processes), is recycled water. Besides, 100% of waste generated by raw materials is reused by our atomized clay supplier as recycled raw material.
