

Hardware				Tools (not includes)
NO.		Draw	QTY	
Α	White rubber plug(Ø6mm)	c para	2	
В	Screws(Ø4 x 68mm)	-	2	
С	Stainless steel cover	00	2	
D	Metal feet		4	
Е	Metal foot screw(M4x16mm)	~	8	

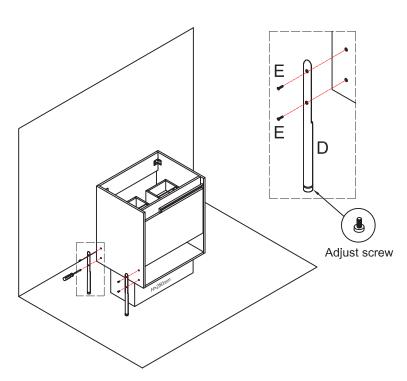

Wall blocking is required for all installation.

The suggested heights without the sink are 30-5/8" for our Resin Basin, or 32-5/8" for our Ceramic Basin. Depending on the sinks selected, the total height will vary from 33-1/2"(850mm) to 35-1/4"(895mm). If an alternate height desired, adjust the rough-in and backing material heights using the dimensions provided.

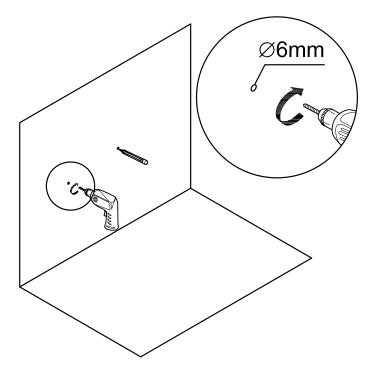

STEP 1

- Place the bathroom cabinet on the floor higher than 250mm.
- $\boldsymbol{\cdot}$ Use metal foot screw E to align metal foot D with the hole.
- · Repeat for every leg.
- \cdot The adjusting screw at the bottom of the metal foot can be raised 0-9/16" (0-15mm).

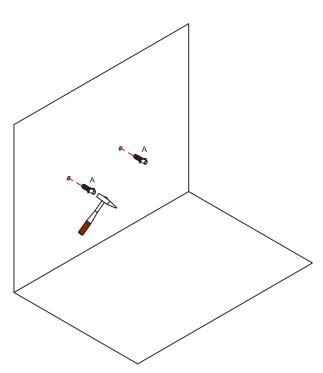

STEP 2

- Mark the pre-drilled holes with a pencil or marker after positioning the vanity.
- \cdot Drill the holes with the appropriate drill-bit based on the material of the wall (see Step 3).

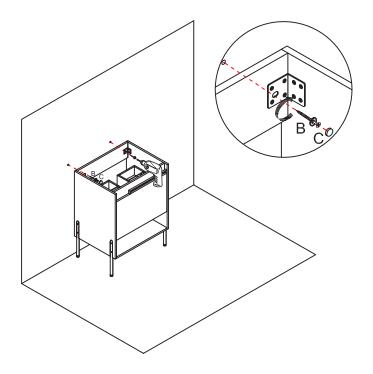

STEP 3

• Use a white rubber plug for brick or concrete walls.

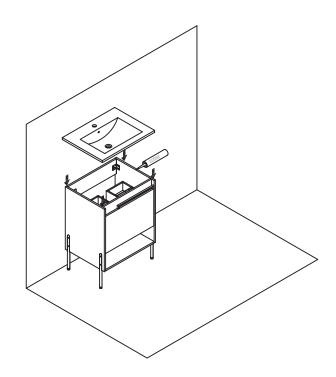

STEP 4

 $\boldsymbol{\cdot}$ Fix the cabinet to the wall with screw B and cover it with stainless steel lid C.

STEP 5 STEP 6

• Install the basin with silicone.

• Installation complete.
